

ECONOMICS

When does it make sense to buy a house instead of renting? How can governments motivate citizens to recycle? Why was the shipping container a game changing invention? These are just some of the questions you will consider in OnRamps Economics.

OnRamps Economics is a semester-long course in which you will learn how to use models and economic analysis to understand how consumers, businesses, and governments make and evaluate economic decisions. Along with learning about core concepts like scarcity, opportunity costs, supply and demand, market structures, and competition, you will understand how to apply economics in your daily life to expand your personal financial literacy.

- ✓ Learn to use logic, math, and technology to interpret basic statistics and apply economic analysis.
- ✓ Apply personal financial literacy skills to real-life scenarios to be an informed consumer.
- ✓ Develop college-level skills in quantitative reasoning, time management, collaboration, and self-advocacy.
- ✓ Earn transferable college credit and prepare for success in college and a career.

DID YOU KNOW?

Along with business and banking, economists work in a wide variety of industries including healthcare, government, and education. The median annual salary for economists in 2021 was \$105,630.*
