

DIGITAL PHOTOGRAPHY

VASE MEDALISTS 2020

**WESTSIDE
PHOTOGRAPHY
STUDENTS TOOK
HOME A TOTAL OF
49 MEDALS!**

Visual Art and Scholastic Event
competition

February 15, 2020

Westside's Digital Photography students master using a digital camera and software to produce high quality photographs. Students will learn the basic functions of the digital camera and how it helps to capture higher-quality images of the people and places around you. Learning to see the world as a photographer while utilizing the fundamentals of art is one of the core components of the digital photography program. Photography projects are developed to teach students how to utilize exposure,

lighting and lenses on a camera. Learning what proper composition is and how to master photography in all conditions are also part of this program. Students will demonstrate skills needed with the post production process in order to transform good photos into works of art.
