

## Introduction

This document provides an overview of the information you need to create and play a page recording using the SMART Notebook Page Recorder, found in SMART Notebook™ collaborative learning software. The Page Recorder allows you to record actions on a SMART Notebook page and play them back. Before you begin, ensure SMART Notebook software is installed on your computer.

## Creating a SMART Notebook Page Recording

1. Open a blank page in SMART Notebook software

2. Click the **Properties** tab and select **Page Recording**

3. Click the **Start Recording** button. A recording symbol appears in the top-left corner of the SMART Notebook page.

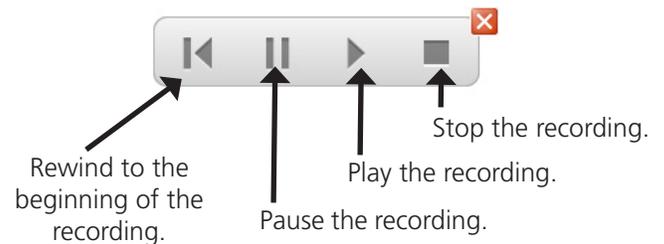

4. Add the information you want to record on the SMART Notebook page

4. Click the **Stop Recording** button. The recording symbol disappears and the SMART Notebook playback toolbar appears at the bottom of the SMART Notebook page.

## Playing a SMART Notebook Page Recording

1. Use the SMART Notebook playback toolbar to control the playback of your page recording:

The SMART Notebook Page Recorder enables you to reveal information gradually on a SMART Notebook page rather than all at once. You can rewind, pause, play and stop the recording by using the SMART Notebook playback toolbar, located at the bottom of the SMART Notebook page. Another extraordinary effect, made simple.
