Data Summary

CAMPUS ENROLLMENT

Demographic data pertaining to the enrolled students at each campus is located in the “Campus Enrollment” table located in the top left of each campus page. The data in this table pertains only to the students enrolled at the campus. Absolute numbers of students enrolled from within the attendance zone and those transferring into the school are shown.

The facility capacity is a functional capacity calculated to assure each campus has adequate ancillary teaching space. In this report, facility utilization refers to the extent to which the building is being utilized. This percent utilization is attained by dividing the campus membership by the capacity.

ZONE POPULATION ENROLLMENT

The “Zone Population Enrolled in HISD Schools” table is available for all campuses with attendance zones. This table shows students enrolled in HISD campuses that live in the attendance zone of the campus. Only grade levels zoned to the campus are tallied. The information is available for the last three years and is useful to see short-term trends in enrollment within the zone area.

SCHOOLS THE ZONE POPULATION ATTEND

HISD Schools in which the zone’s enrolled students attend are listed in the top half of the table. The second half of the table is an estimate of students in other public schools (charter systems and other school districts). These estimates are based on State data obtained from the Texas Education Agency (TEA) and represent Fall 2019 transfers. Where there is no data provided by the TEA, the “Not in Public School” number reflects HISD enrollment subtracted from the census estimate. This data is not perfect, as families often move without reporting their new zone of residence to the school.

All zoned campus pages contain a table titled “Schools the Zone Population Attend”. The total at the bottom of the table is an estimate of the number of students living in the attendance zone area based on the 2010 U.S.

Census Summary File 1. The census estimate is used to determine the number of students not in public school. These students will fall within three categories: private school, home school, and drop-outs. It is possible that drastic changes in population since the census may cause unbelievable estimates.

TRANSFERS WITHIN HISD

Zoned campuses will have two maps: “Transfers Out” and “Transfers In”. Only HISD-enrolled students make up the data shown on these maps. Each dot represents either the home campus or receiving campus of the transfers. Each non-zoned campus transfer map shows the number of enrolled students by census block group.
