

Building updates

Risk Management conducted a safety inspection/intruder alert inspection and found the rear glass external door to be a safety issue. The door will be upgraded. Brian Busby's office will be contacted and asked for replacement to be at the expense of HISD.

The topic of using temporary buildings was addressed. They are cost prohibitive at \$250,000 each. These buildings are owned by HISD, yet each school is charged their use.

The calculators that were stolen were taken on December 27. There is reason to believe that employees of Metro cleaning company may have something to do with the theft. Our feeder school, FBMS also has experienced theft of calculators as well as other schools. Similar calculators are being sold on Craigslist and other online sale sites for \$70 each.

Program Changes

9th graders will have a new course option: Computer Aided Drafting. This is thanks to the Perkins Grant.

STAAR EOC

114 Re-testers in 2019; Re-tester scores improved by 3%
Algebra scores increased 23%
