Mission/Vision

- We looked at and discussed the vision/mission and were all ok with moving this forward to the faculty to vote

Bell Schedule

- A group of folks put together a survey that students took. The committee took a look at those results and discussed that
- We discussed ID's and having the kids
- It was suggested to have a goal set for how many kids will have an ID

Master Schedule

- Cannot even program until April because of the new program that we are using. We will not be able to do this on the time frame that we had originally set.
- We need to be efficient with the master schedule.....more level and even across the board

Safety

- There has been talk of metal detectors, but the school board is saying that they want more of a concrete plan....so we are not sure if and when this will happen
- Metal Detectors do need board approval. It was discussed that we would have 2 at both main entrances. It was discussed that it would be funded and the personnel provided.
- There is no final decision on the metal detectors.
- The perimeter fence will be decided this week!

Projections

- We projected 2700 enrollment for next year

Other

- We are looking at beautification of the campus. We are doing murals and looking at different options
- Looking at maybe getting more canapés outside, fixing the tennis courts, as ours are in bad shape right now
- Maybe looking at keeping one of the courts a place for the golfers and help fix that.
- Also looking at cleaning up the field house and the walk out to the field house...bringing back the paws!!
- We would love to do a new track.....but at this time....we cant afford it right now! We are trying to work out deals with the district.....and or getting Mrs. Tease to help us fundraise for this big purchase
- We are also looking at getting a new marquis, updating the lights at the fields. The scoreboards aren't working in the fields
- There is a list of things that we are trying to fix and update!
- This all has to come out of our campus budget.....not the district
- It was stated that even though we started so much in debt.... we are still able to do some of these things to help out the campus!
- We talked about how perception is huge, and we need to work on the first impression of the campus

Other Updates

- Credit recovery change for this year...we are not doing May credit recovery
- Testing coming up- went over a brief summary
- We did two major vamps in the system.....as in tardy sweeps on a regular basis. We have someone who is doing this full time...and putting the kids into the spreadsheets...and dropping off the referrals with the AP....so they can follow up with those consequences with the students
- We started filing on students that have not been in class or in school at all to the actual courts for a certain amount of days. New processes have been implemented to help hold these kids accountable for attending school
- Dress code: not looking to implement like a uniform.... but definitely looking at implementing more dress code policies. Landa is going to meet with students and get input from them moving forward
- Looking at starting a student council; having each grade level have student officers
- It was suggested that kids use the power washing as community service
- It was suggested that we maybe do a one-day community and or campus cleanup/beautification that the entire school participates in
