

Eco-Schools USA Grant Opportunity Student-led Energy Reduction Campaign

Due June 15, 2020

Did you know that across the United States, school districts spend more than \$10 billion a year on energy, and up to 30 percent of that energy is used inefficiently or unnecessarily?

National Wildlife Federation’s Eco-Schools USA and the Watt Watchers Program of Texas have joined forces to help schools boost energy literacy for K-12 students and to help schools save money by saving energy.

By implementing energy conservation measures and using energy efficient technologies, schools can significantly cut energy use while engaging students in STEM investigations and project-based learning.

Participating Schools Will Receive:

- 1) The TEKS aligned Watt Watchers of Texas Curriculum
- 2) Continuing Professional Education Credits (CPEs) for teachers that attend the webinar
- 3) Seed grant of up to \$350
- 4) Up to 2 site visits from NWF
- 5) Eco-Schools USA recognition upon completion of campaign

Participating Schools Agree to:

- 1) Attend a 2-3 hour professional development webinar (July 29)
- 2) Follow the Eco-Schools USA 7-Step Framework
- 3) Form an Eco-Action team of 2 teachers (both must attend the first webinar) and students
- 4) Launch an energy reduction campaign for a minimum of 6 weeks, complete by May 1, 2021
- 5) Conduct a pre and post energy audit with their students

To apply for this opportunity, please provide your school name and the names and email addresses of the 2 team members who will be attending the webinar to Marya Fowler fowler@nwf.org . **Deadline to apply is June 15.**
